

**WATERPROOF
IP67**

MODEL

MIDLAND G18

CODE

C1145

Midland expands its range of semi-professional transceivers with a new model: **MIDLAND G18**, the latest and most advanced PMR446 radio!

Compact but rugged at the same time, **MIDLAND G18** is great for use in the hardest environments.

G18 boasts an **aluminum die cast chassis** that guarantees the **IP67** certification: **total protection from dust** and from the **immersion in water up to 1m depth for 30 minutes**.

Multi-task radio and extremely reliable, **G18** provides clear communications even in noisy areas.

G18 is supplied with many features to make operating more enjoyable and professional,

such as the **scrambler** to provide private conversations and the **vocal tuning** that announces the channel or function just selected.

Besides, by means of the optional **programming software PRG-G15** you can increase the performance of your radio or to reduce its functionality by enabling or disabling some features (CTCSS, DCS, TOT, VOX, ROGER BEEP, SQUELCH, VOICE, Emergency...).

In particular with PRG-G15 you can activate the **FM radio** so as to listen to your favourite radio stations, or the **Compander** for an excellent audio level.

G18 incorporates other functions such as SCAN and VOX for hands-free conversations and is supplied with **99 channels (8 PMR446+ 91 pre-set)**, 50 CTCSS tones and 105 DCS codes.

Up to **19 hours** of operating time with the supplied **high capacity 1600mAh Li-Ion battery pack**.

Midland G18 is an excellent choice, no matter how you plan to use it: for your leisure time or professional situations.

COLOUR: black
